

# HP SMART

Print, scan, and share using your  
HP printer anytime, anywhere

# HP Smart App Help

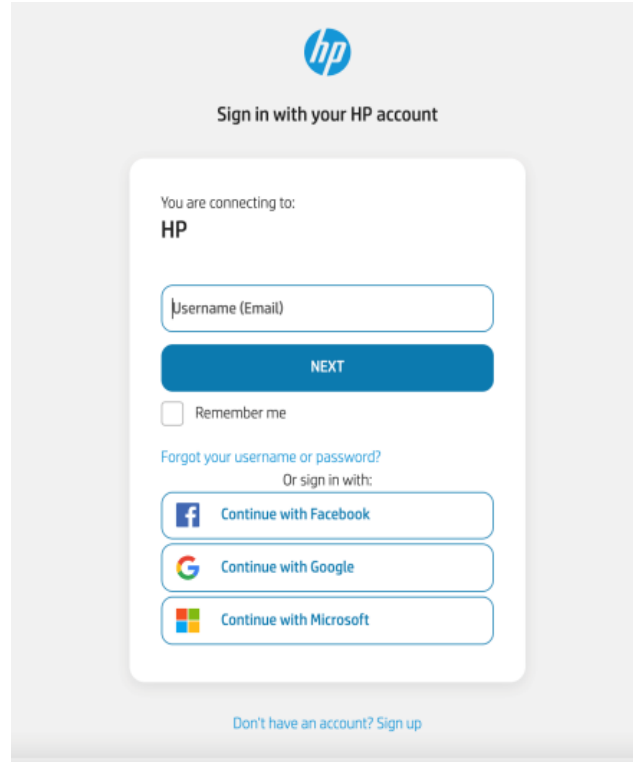

The **HP Smart App** is a utility that allows you to use your smartphone or other appropriate software to prepare, scan, print, share, and arrange your HP printer. Print immediately from social media or paperwork from cloud storage, scan while on the go, easily order supplies, and set up your HP printer with the HP Smart App.

Whether you're on the go and need to print directly to your home printer or you want a quick and easy way to print photos from social media or documents from your Google Drive, the HP Smart App can assist you.

*(Note: To fully utilize the HP Smart app's features, create a free HP account at [www.hp.com](http://www.hp.com) and activate the application using the same user credentials.)*

# How do I sign up for an HP account?

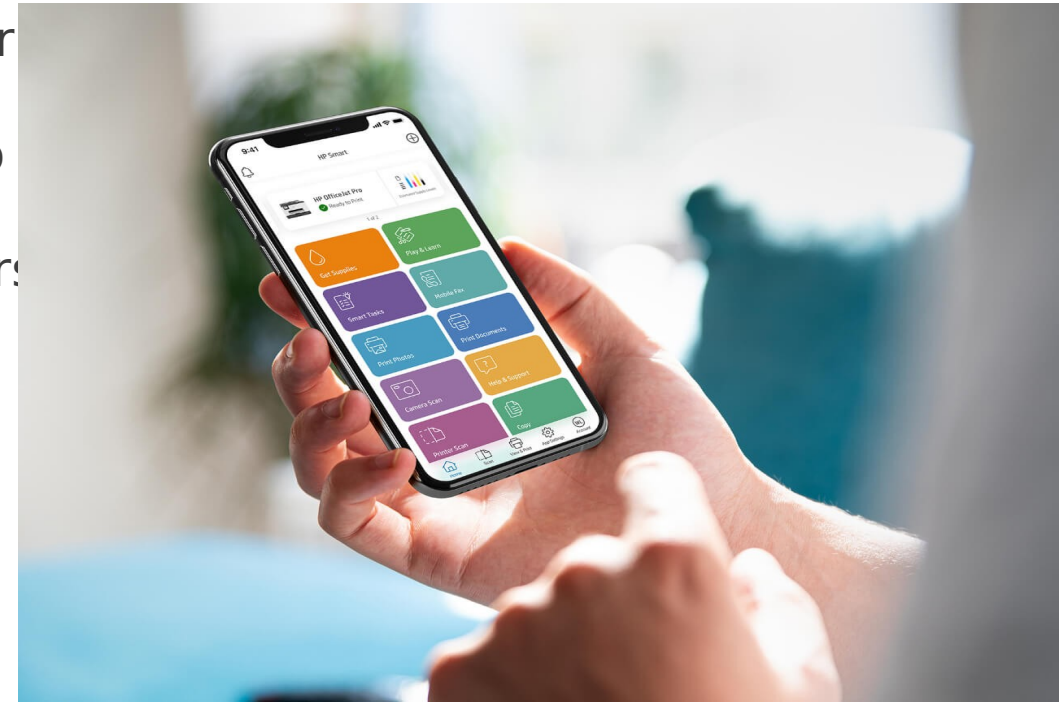

Open a web browser on a PC or smartphone and type [www.hp.com](http://www.hp.com) and click the “**Sign in**” button on the right-side top corner.

A screenshot of the HP sign-in page. At the top is the HP logo and the text 'Sign in with your HP account'. Below this, it says 'You are connecting to: HP'. There is a text input field for 'Username (Email)', a blue 'NEXT' button, and a checkbox for 'Remember me'. Below the checkbox is a link 'Forgot your username or password?'. Underneath is the text 'Or sign in with:' followed by three buttons: 'Continue with Facebook', 'Continue with Google', and 'Continue with Microsoft'. At the bottom, there is a link 'Don't have an account? Sign up'.

Now click on the **Signup** button and provide significant information such as your name, email address, phone number, and an alpha-numeric password. A security verification may be sent to your phone or email for account activation; further, your HP account is ready to use.

You can use a single HP account for various purposes, such as making an online purchase from the HP store, registering for Instant Ink service, claiming a warranty, repair, or replacement, accessing the online HP service center, etc.

- You can install this app on your Android phone using the above-mentioned procedure. This may increasingly assist you in printing, scanning, and copying from your phone in a very simple, quick, and cost-effective manner.
- No more tangled cables are required; all you need to do is follow the step-by-step instructions to connect the printer to your phone and send a print command from anywhere in your home or painting area.
- Check that your computer and printer are both connected to the same software.
- Install the printer app, then **click Start** to look at the printers in the community.
- Accept all comparable **terms and conditions** so that the printer can be properly connected and ready to print.
